Evolution of learning errors. Line plots are means; boxplot is for gradient boosting with K2R sampling

Legend:
- gradient boosting (K2R sampling, agressive with ['no_fast_pskip'])
- random forest (no transfer)
- random forest (K2R sampling)
- gradient boosting (no transfer)
- gradient boosting (K2R sampling)
- linear (no transfer)
- linear (K2R sampling)

y-axis: learning errors (MRE)

x-axis: size of the training set (in % of the whole dataset)
